Pentaho Developer Edition

Get hands-on with Pentaho. Build skills. Prototype ideas.
Non-Production Use Only.

Whether you're testing the waters or teaching others how to navigate them, the Pentaho Developer Edition is your free, self-guided entry point to learning core data integration and analytics. Ideal for prototyping small projects, training users, or deepening your understanding of how data flows from source to insight.

Who It's For:

- Developers learning ETL and BI concepts hands-on
- Trainers and educators
- Teams prototyping small-scale data projects

Looking to explore full enterprise Pentaho Data Integration & Business Analytics functionality?

The Developer Edition is great for getting hands-on with core features, but if you're planning for production, need advanced support, or want to evaluate enterprise-scale capabilities, our **Pentaho Data Integration and Business Analytics free trial** is your best next step.

Experience enterprise-grade security, scalability, and flexible deployment options — all

Instalación Pentaho Community Edition

Debe descargar el JDK que se utilizará para crear las variables del entorno para Pentaho

The screenshot shows the Oracle Java Downloads page for JDK 25 on Windows. The browser address bar shows the URL: oracle.com/java/technologies/downloads/#jdk25-windows. The page has a dark header with navigation links: "Tools and resources", "Java downloads" (selected), and "Java archive". Below the header, it says "Earlier JDK versions are available below." There are tabs for "JDK 25" and "JDK 21". The main section is titled "Java SE Development Kit 25 downloads". It states that JDK 25 binaries are free to use in production and free to redistribute, at no cost, under the [Oracle No-Fee Terms and Conditions \(NFTC\)](#). It also mentions that JDK 25 will receive updates under the NFTC, until September 2028, a year after the release of the next LTS. Subsequent JDK 25 updates will be licensed under the [Java SE OTN License](#). Below this, there are tabs for "Linux", "macOS", and "Windows" (selected). A table lists the download information for the x64 Compressed Archive.

Product/file description	File size	Download
x64 Compressed Archive	204.30 MB	https://download.oracle.com/java/25/latest/jdk-25_windows-x64_bin.zip (sha256)

Una vez descargado debe copiarlo en el C:\Archivos de Programas\Java\Jdk-XX y crear las variables del entorno correspondientes.

The screenshot shows the "Variables de usuario para DELL" dialog box in Windows. It displays a list of user variables. The variables "PENTAHO_JAVA" and "PENTAHO_JAVA_HME" are highlighted in yellow. Their values are both set to "C:\Program Files\Java\jdk-11\bin". Other variables shown include "OneDriveConsumer" (C:\Users\DELL\OneDrive), "Path" (C:\Users\DELL\AppData\Local\Programs\Python\Launcher\;C:\Use...), "TEMP" (C:\Users\DELL\AppData\Local\Temp), and "TMP" (C:\Users\DELL\AppData\Local\Temp). At the bottom of the dialog, there are three buttons: "Nueva...", "Editar...", and "Eliminar".

Variable	Valor
OneDriveConsumer	C:\Users\DELL\OneDrive
Path	C:\Users\DELL\AppData\Local\Programs\Python\Launcher\;C:\Use...
PENTAHO_JAVA	C:\Program Files\Java\jdk-11\bin
PENTAHO_JAVA_HME	C:\Program Files\Java\jdk-11\bin
TEMP	C:\Users\DELL\AppData\Local\Temp
TMP	C:\Users\DELL\AppData\Local\Temp

NOTA: En caso, que no levante las variables una alternativa es omitir la carpeta bin y dejar hasta JdkXX en las variables del entorno

Instalación Pentaho Community Edition

Descarga de Controlador JDBC

Una vez descargado descargar el controlador JDBC, esto del sitio de Microsoft:

<https://learn.microsoft.com/en-us/sql/connect/jdbc/microsoft-jdbc-driver-for-sql-server?view=sql-server-ver16>

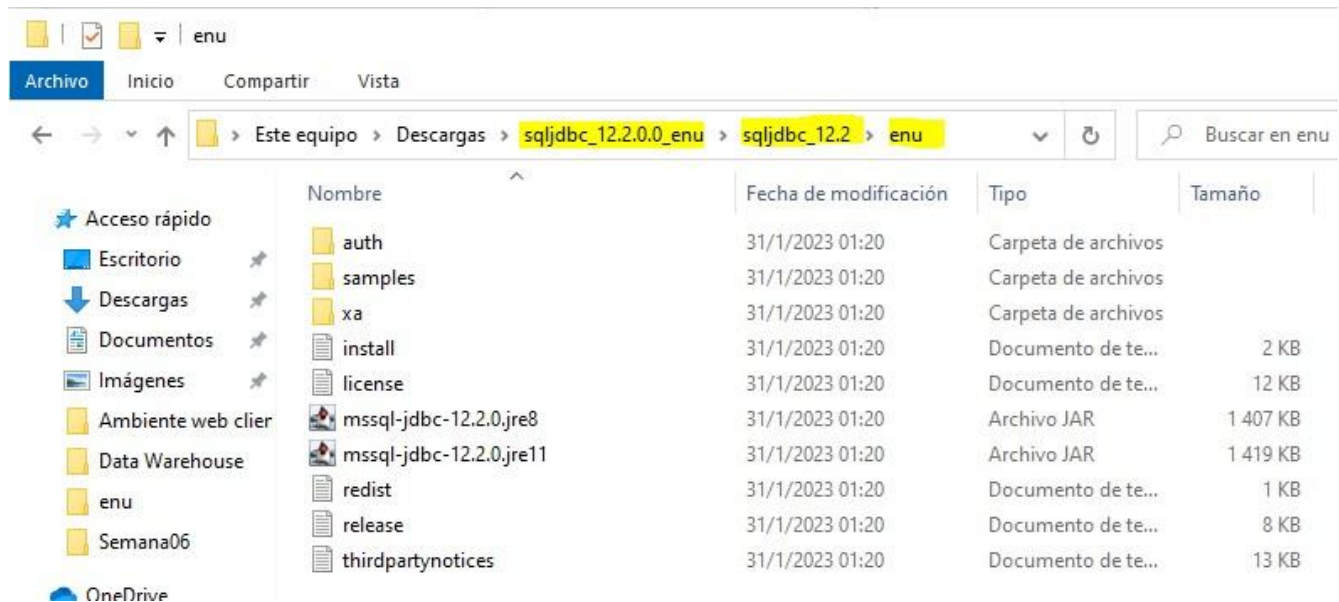

The screenshot shows the Microsoft JDBC Driver for SQL Server download page. The browser tabs include 'conectar Microsoft Sql Server y P...', 'java - SQL Server JDBC Error: The...', and 'Microsoft JDBC Driver for SQL Se...'. The address bar shows the URL: 'learn.microsoft.com/en-us/sql/connect/jdbc/microsoft-jdbc-driver-for-sql-server?view=sql-server-ver16'. On the left, there is a 'Version' dropdown menu set to 'SQL Server 2022' and a 'Filter by title' search bar. Below these are several links: 'Programming to interact with SQL Server', 'Welcome to SQL Server >', 'SQL Server drivers', 'Driver feature support matrix', 'SQL Server driver history', 'SQL data developer', '> ADO.NET', and 'JDBC'. Under 'JDBC', there is a link to 'Microsoft JDBC Driver for SQL Server' with sub-links for 'Getting started' and 'Overview'. On the right, there are links for 'Performance and Reliability', 'Troubleshooting', 'Code Samples', and 'Compliance and Legal'. Below these is a 'Community' section with a link to 'Feedback and finding additional JDBC driver information'. The 'Download' section has a link to 'Download Microsoft JDBC Driver for SQL Server' with a note that it has additional information about Maven projects, and more. The 'Samples' section has links for 'Sample JDBC driver applications' and 'Getting started with Java on Windows?'. The 'Overview' link is highlighted in the left sidebar.

Seguidamente seleccionar la versión que se desea descargar (según el sistema operativo)

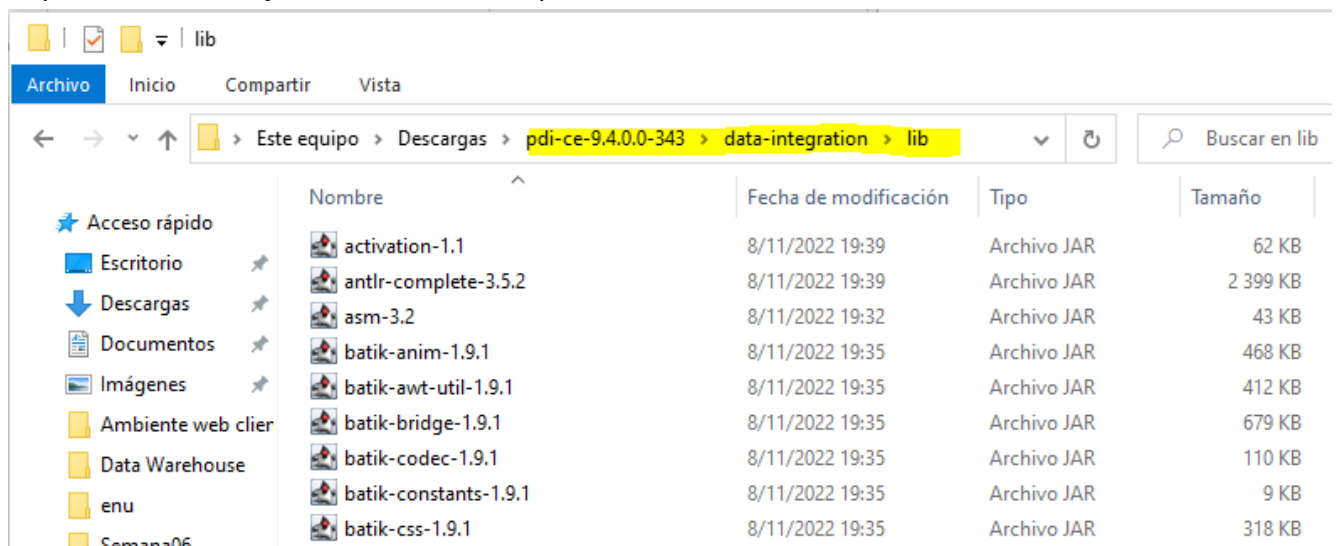

The screenshot shows the 'Download' section of the Microsoft JDBC Driver for SQL Server page. The browser tabs include 'Learn', 'Documentation', 'Training', 'Certifications', 'Q&A', 'Code Samples', 'Assessments', 'Shows', and 'Events'. The address bar shows the URL: 'learn.microsoft.com/en-us/sql/connect/jdbc/download-microsoft-jdbc-driver-for-sql-server?view=sql-server-ver16'. The left sidebar has a 'Version' dropdown menu set to '2' and a 'Filter by title' search bar. Below these are several links: 'to interact with SQL Server', 'SQL Server >', 'drivers', 'support matrix', 'driver history', 'oper', 'JDBC Driver for SQL Server', 'ed', 'd', 'otes', 'quirements', and 'matrix'. The main content area has a heading 'Download Microsoft JDBC Driver for SQL Server' and a sub-heading 'Article • 02/01/2023 • 2 minutes to read • 15 contributors'. There is a 'Feedback' link. The text describes the Microsoft JDBC Driver for SQL Server as a Type 4 JDBC driver that provides database connectivity through the standard JDBC application program interfaces (APIs) available on the Java platform. The driver downloads are available to all users at no extra charge. They provide access to SQL Server from any Java application, application server, or Java-enabled applet. The 'Download' section has a heading 'Download' and a sub-heading 'Version 12.2 is the latest general availability (GA) version. It supports Java 8, 11, 17, and 19. If you need to use an older Java runtime, see the Java and JDBC specification support matrix to see if there's a supported driver version you can use. We're continually improving Java connectivity support. As such we highly recommend that you work with the latest version of Microsoft JDBC driver.' Below this are two download links: 'Download Microsoft JDBC Driver 12.2 for SQL Server (zip)' and 'Download Microsoft JDBC Driver 12.2 for SQL Server (tar.gz)'. The 'Overview' link is highlighted in the left sidebar.

Instalación Pentaho Community Edition

Se le presentará el archivo y debe de descomprimirlo. Una vez finalizado ingresar a la carpeta hasta la siguiente ruta

Copiar los archivos .jar en la ruta lib del Spoon

En este punto se recomienda reiniciar el Spoon, en caso de tenerlo abierto.

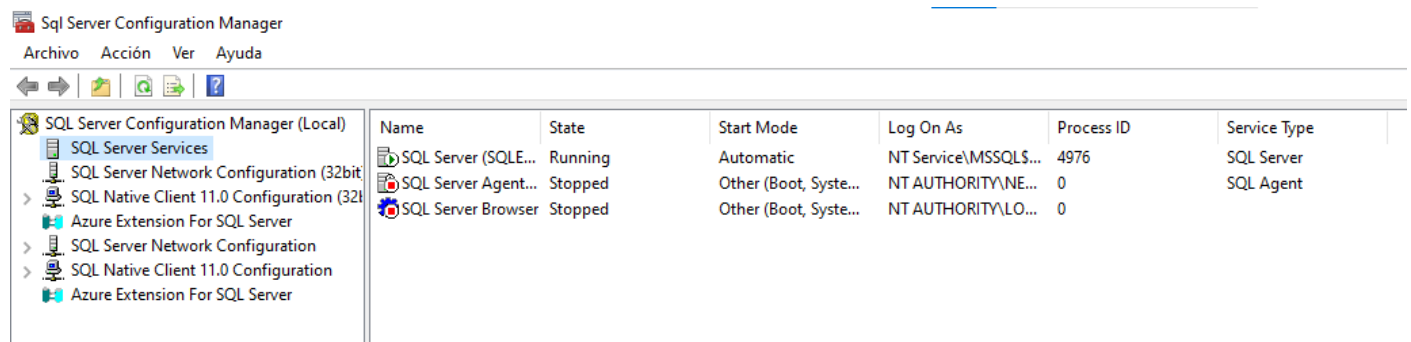

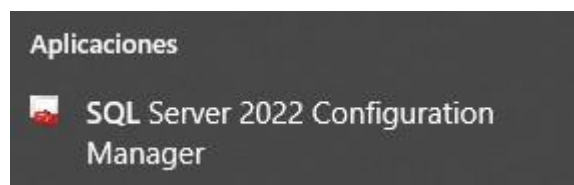

Instalación Pentaho Community Edition

Configuración de un usuario para conexión a la base de datos

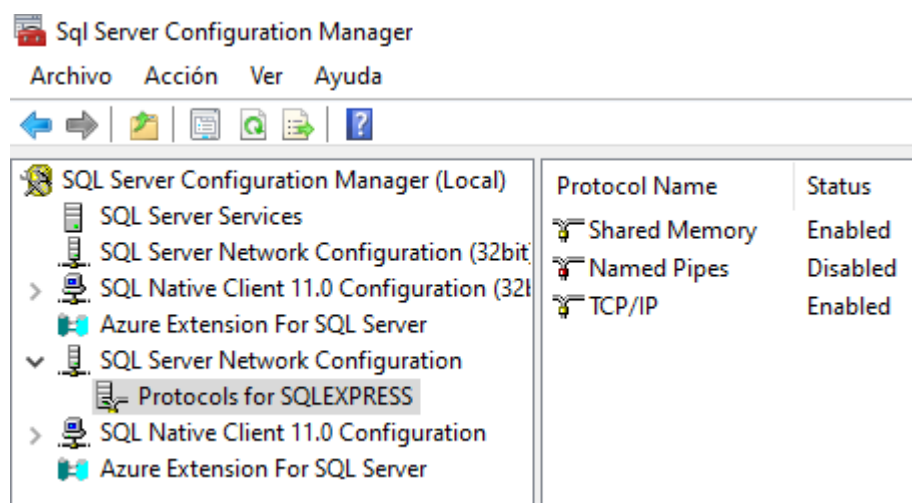

Paso 1

Configuración de puertos (debe abrirse con privilegios de Administrador y al seleccionar las opciones realizarlo con Click Derecho)

- 1- Ingresar a la consola de configuración de Motor de Base de datos

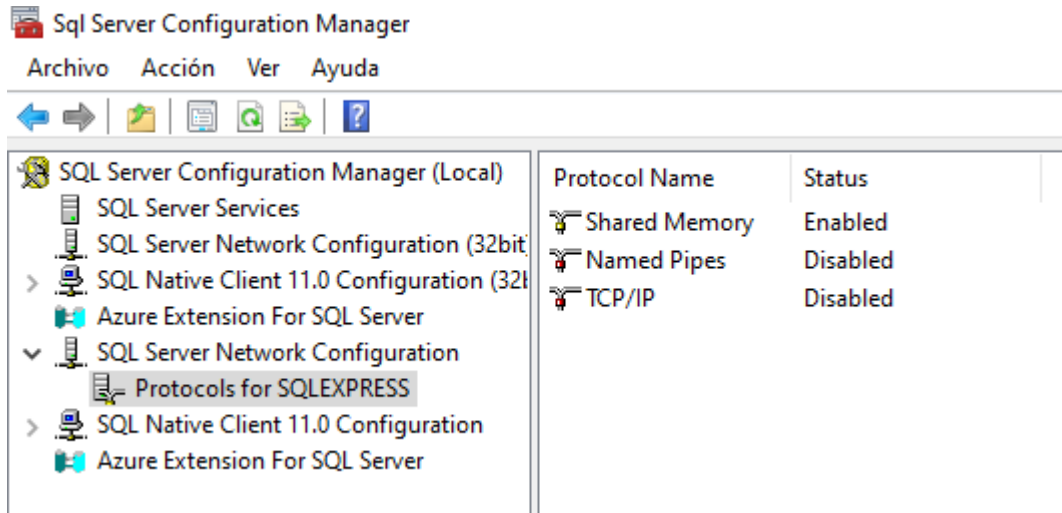

- 2- En esta pantalla debemos ingresar al apartado "SQL Server Network Configuration" y posterior ingresar a la opción Protocols for SQLEXPRESS.

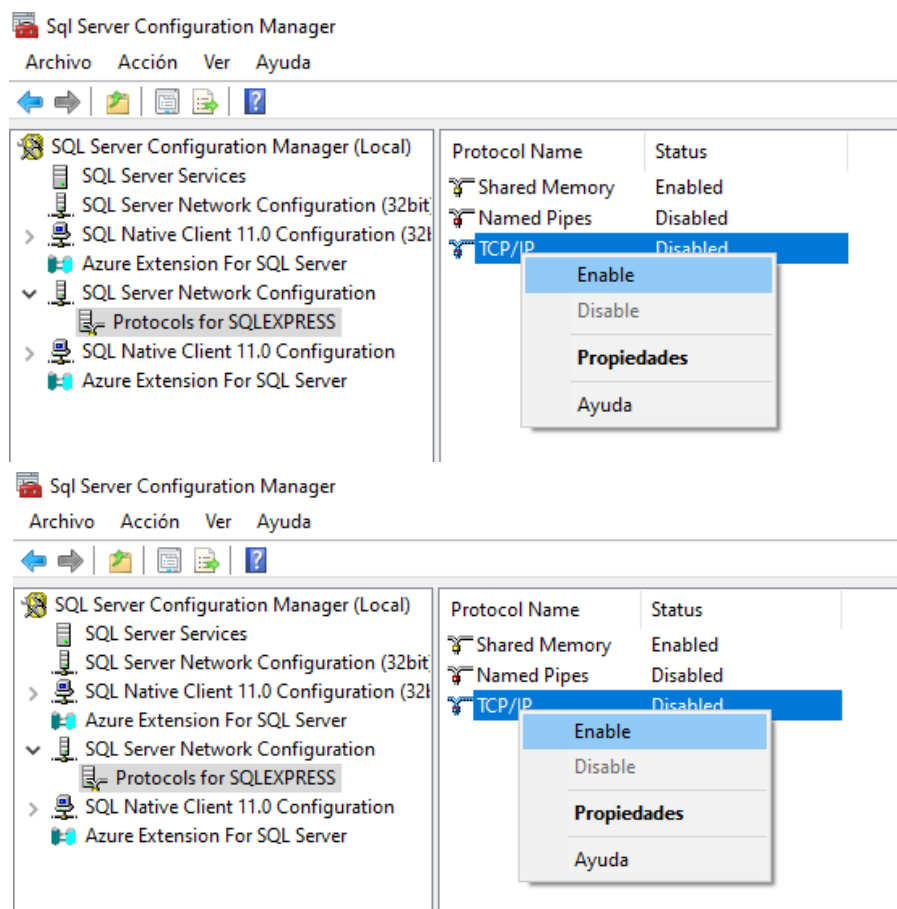

Instalación Pentaho Community Edition

- 3- En esta pantalla se deberá seleccionar la opción "TCP/IP"

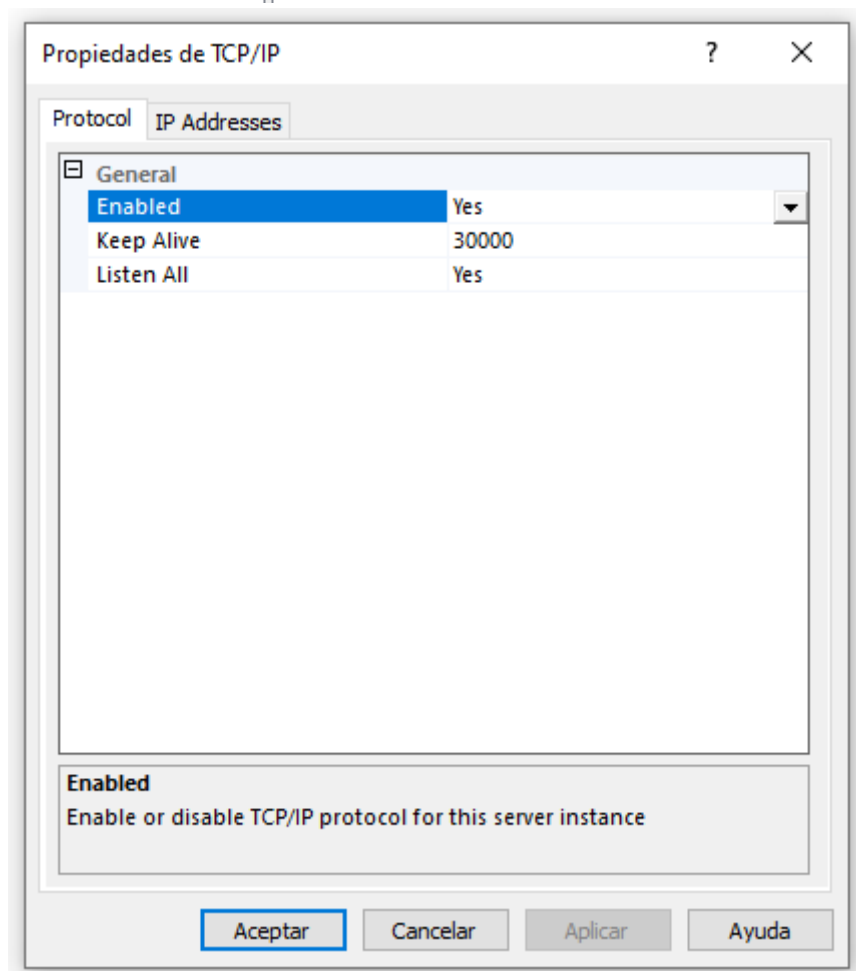

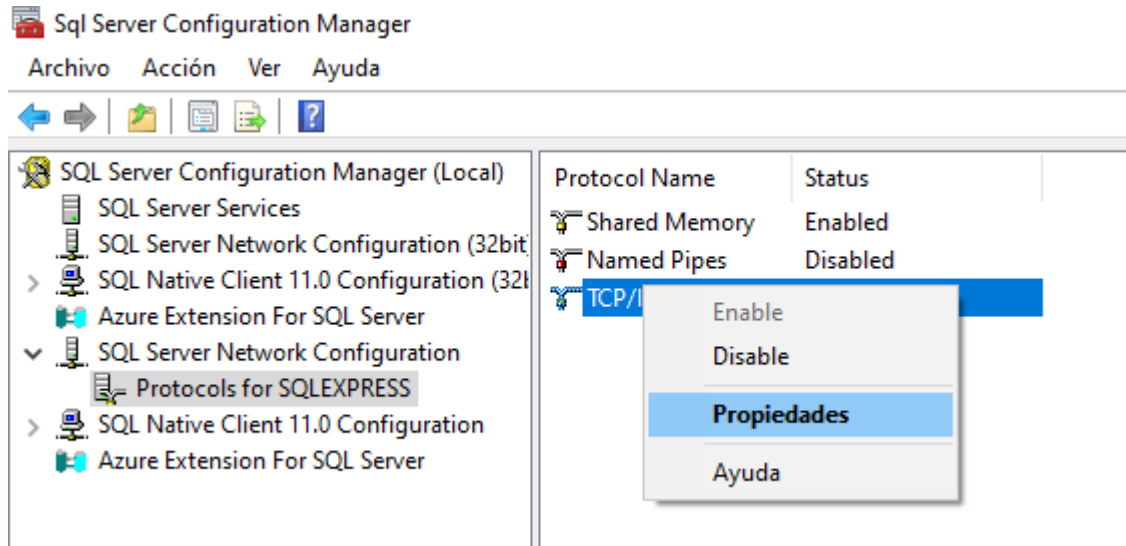

- 4- Como se puede observar está deshabilitado, por lo que, se deberá activar y habilitar el puerto 1433, el cual es el puerto de comunicación por defecto a nivel de las bases de datos.

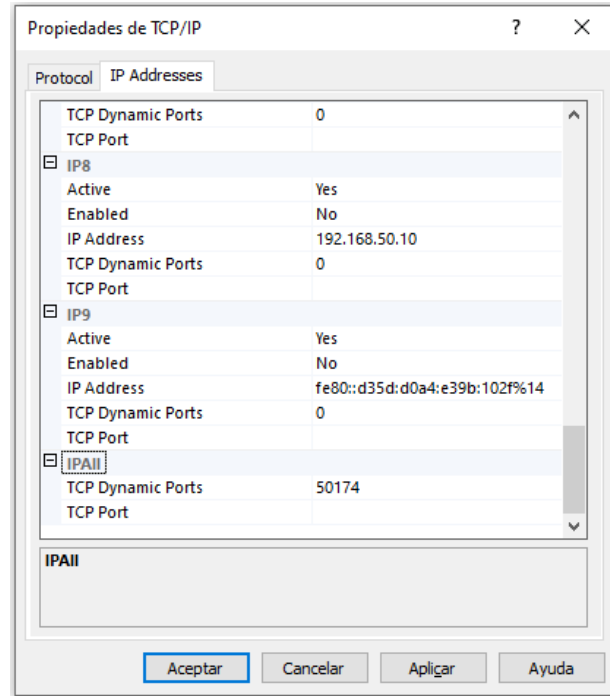

Instalación Pentaho Community Edition

Posterior a esta activación, se debe activar el puerto 1433

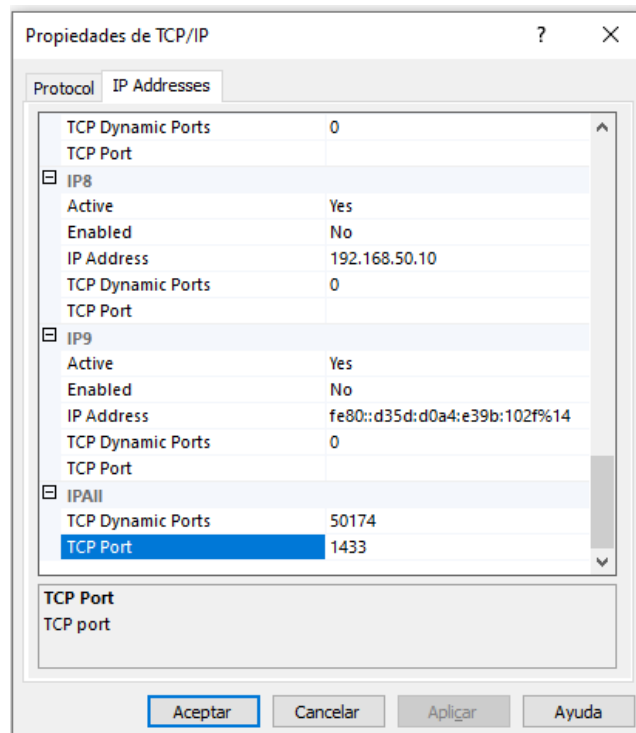

Instalación Pentaho Community Edition

Una vez en este punto, se selecciona la pestaña “IP Address” y desplazarnos al final

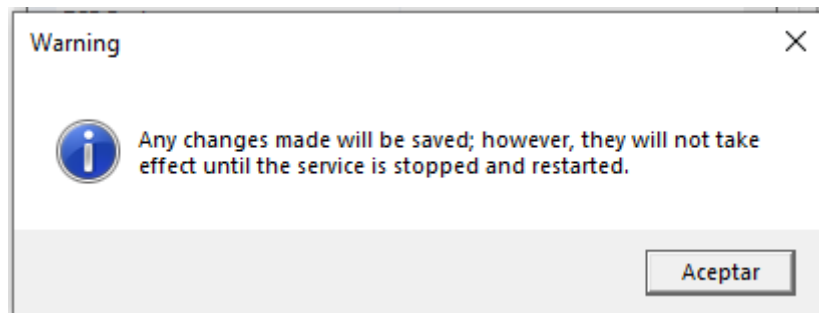

En este punto incorporar en el campo TCP Port el valor 1433

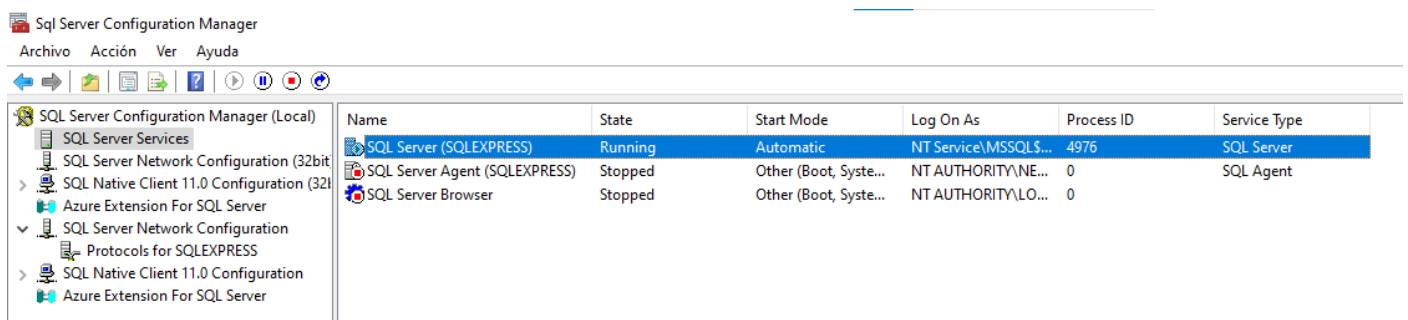

Instalación Pentaho Community Edition

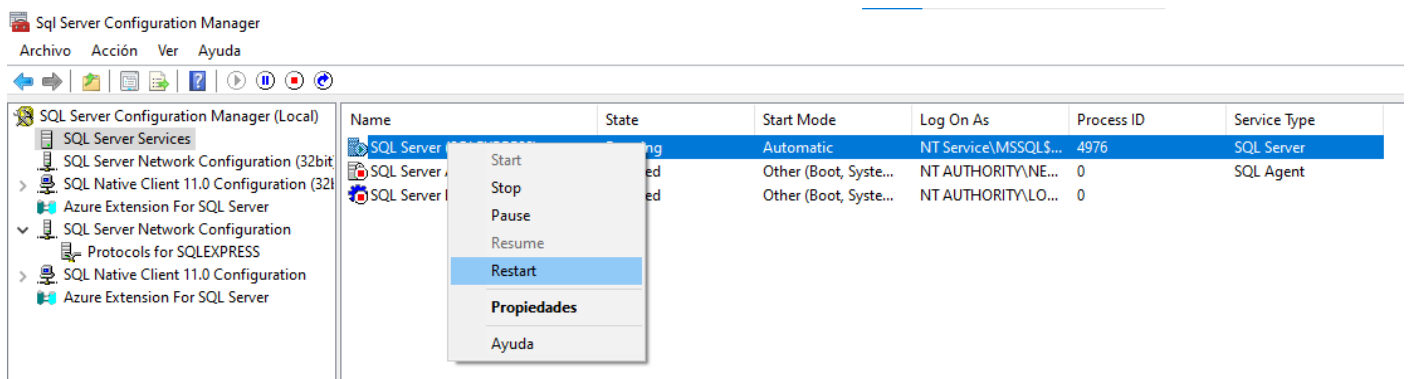

Una vez finalizados estos se mostraron mensajes de que se requiere reinicio del servicio de motor de bases de datos

Se debe presionar aceptar y posterior a ello ingresar a la opción "SQL Server Services" y desde acá se realiza el reinicio del servicio.

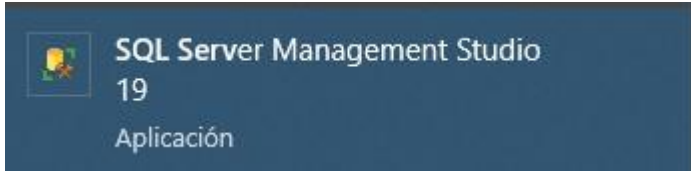

Acá se selecciona el Servicio "SQL Server (SQLEXPRESS)" y se selecciona la opción "Restart"

Posterior, se finaliza el proceso y se continua a la consola del Management Studio de SQL Express.

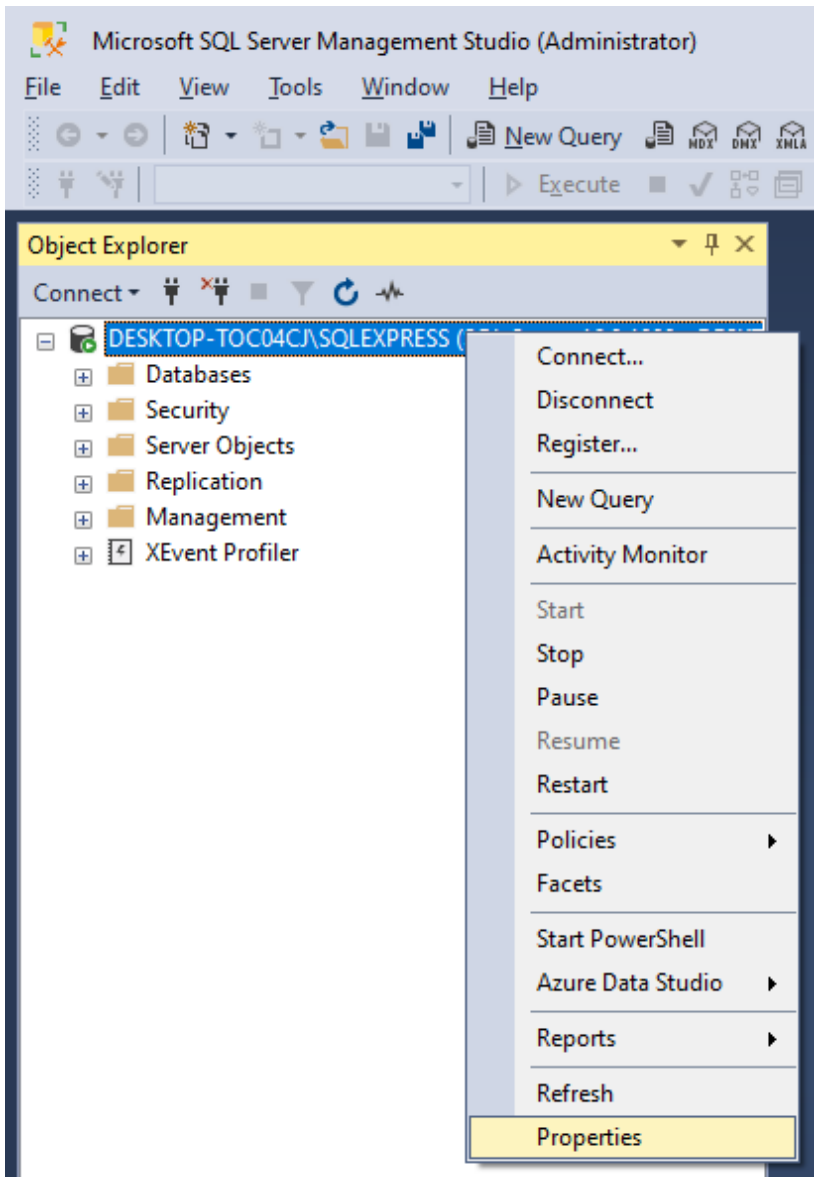

Instalación Pentaho Community Edition

Al igual que la consola anterior, ejecutarla con privilegios de Administrador

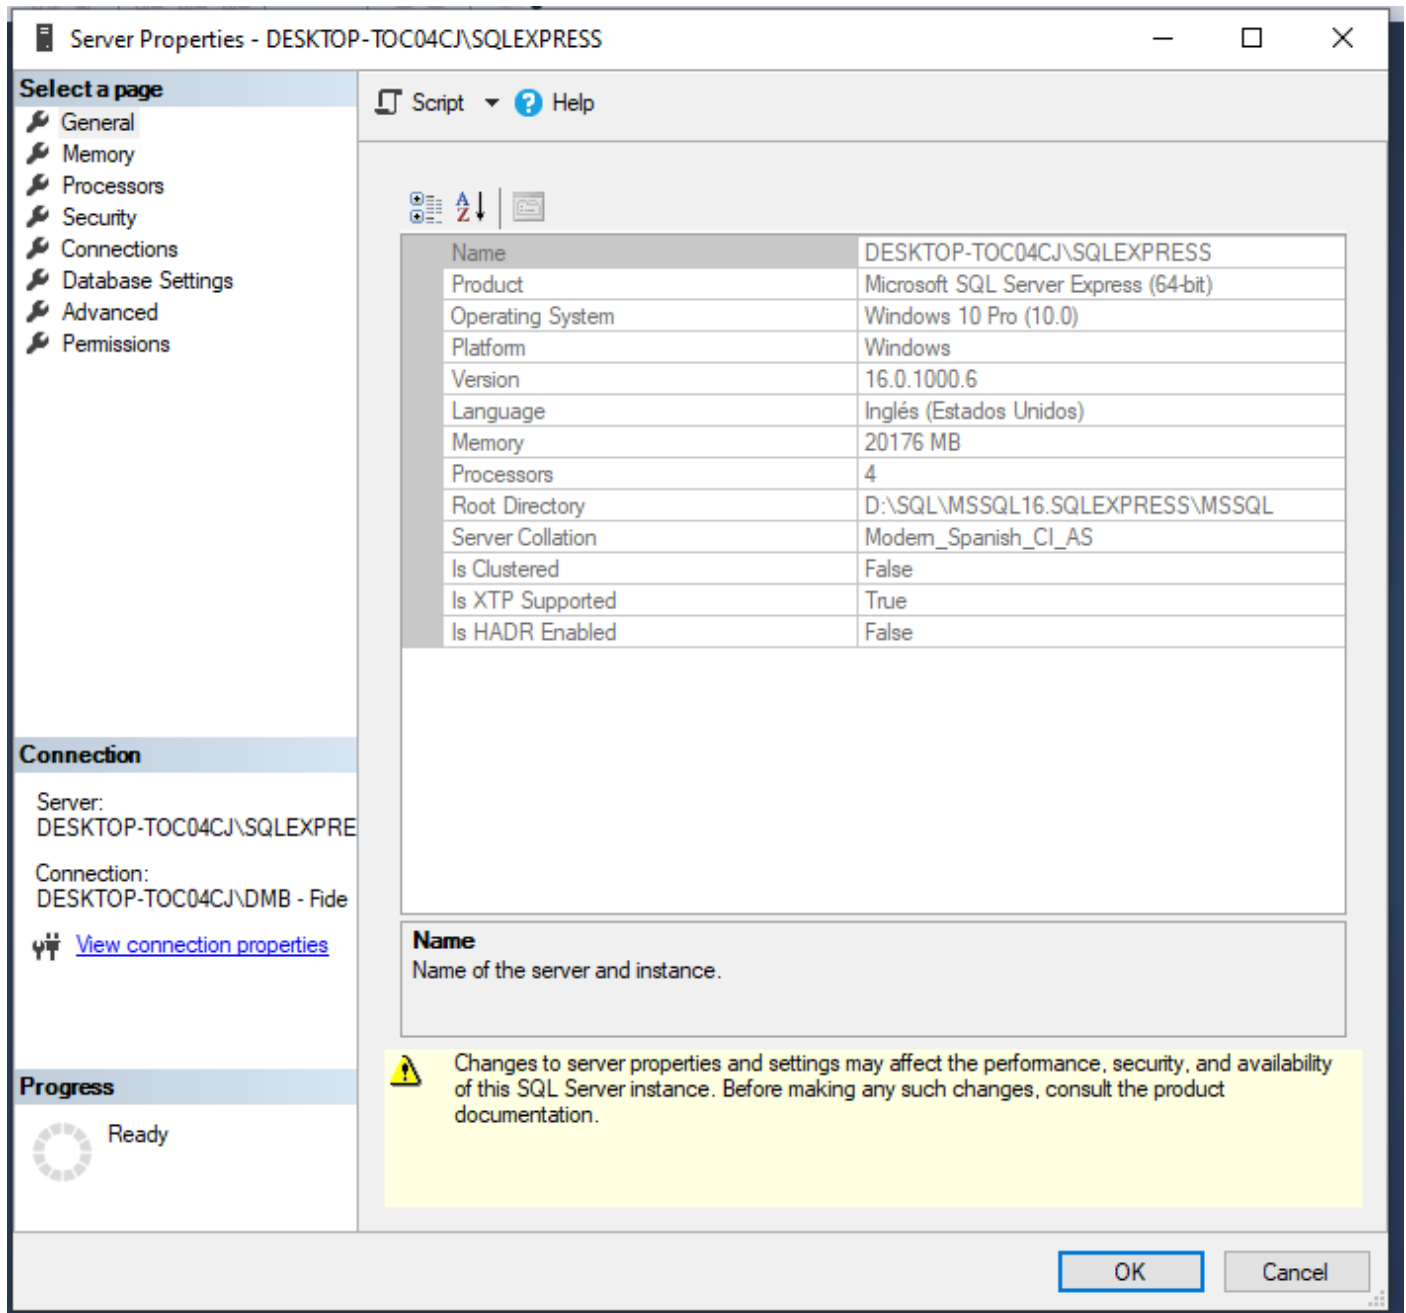

Una vez en la consola, iniciaremos con la configuración para la creación de un usuario de conexión a la base de datos:

- 1- Se deberá ingresar a las opciones de seguridad, por lo que, se ingresará primeramente a las opciones, seleccionando el gestor de base de datos:

Instalación Pentaho Community Edition

Instalación Pentaho Community Edition

En esta pantalla, debe seleccionar la opción “Security” y habilitar las conexiones con “SQL SERVER y Windows Authentications”

Server Properties - DESKTOP-TOC04CJ\SQLEXPRESS

Instalación Pentaho Community Edition

Una vez realizado esto, se procede a crear el usuario de conexión a la base de datos:

- 1- Navegar a la carpeta "Security" y posterior a la carpeta "Logins"

- 2- Presionar clic derecho "New Login.."

Instalación Pentaho Community Edition

- 3- Crear el usuario, los datos a utilizar son a consideración de cada persona, pero pueden utilizar los siguientes como referencia:

Utilizar como nombre “DB_CONNECT”, es un nombre fácil de recordar y posee un objetivo descrito en el nombre.

Indicar una contraseña, deben recordarla, como es un ambiente controlado, pueden desmarcar los checks de complejidad en el password, para facilitar el acceso, pero solo en estos ambientes.

Instalación Pentaho Community Edition

En la siguiente pantalla brindar el role “SYSADMIN” esto para que el usuario tenga control sobre cualquier base de datos que se cargue o se genere.

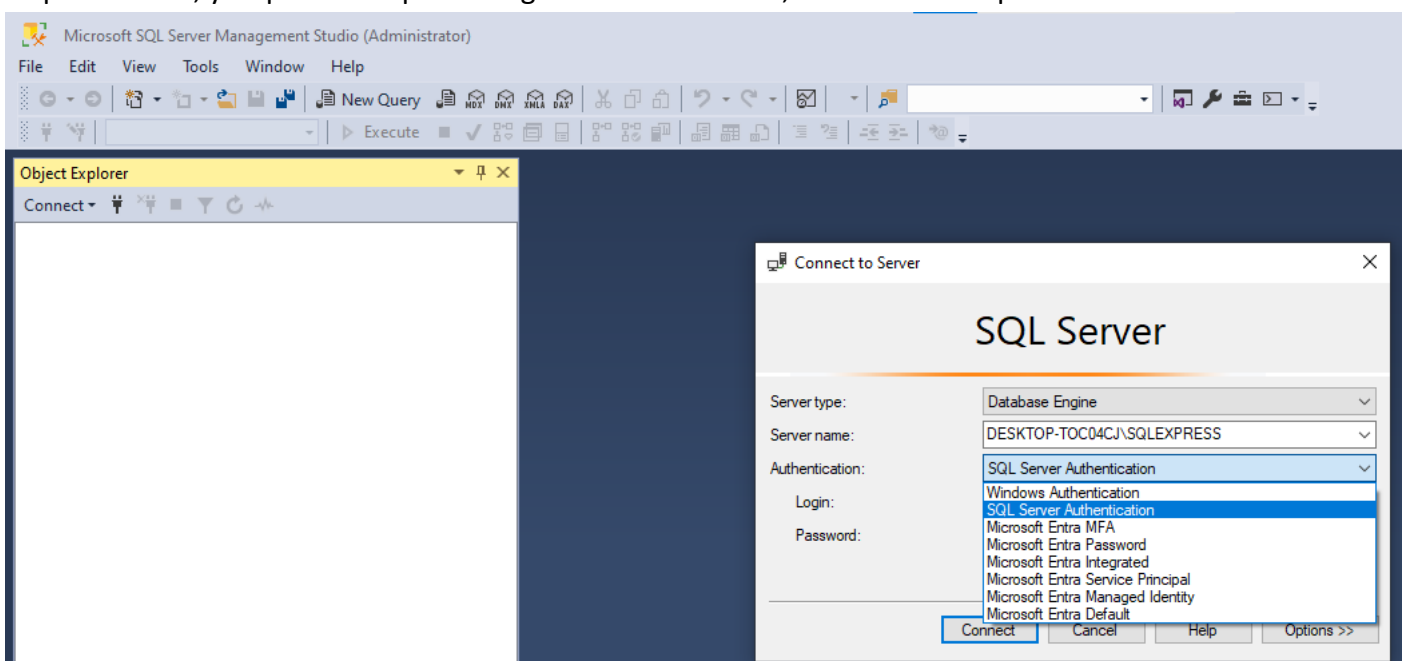

Y validar en la pestaña Status, los puntos de Permission to connect... y Login

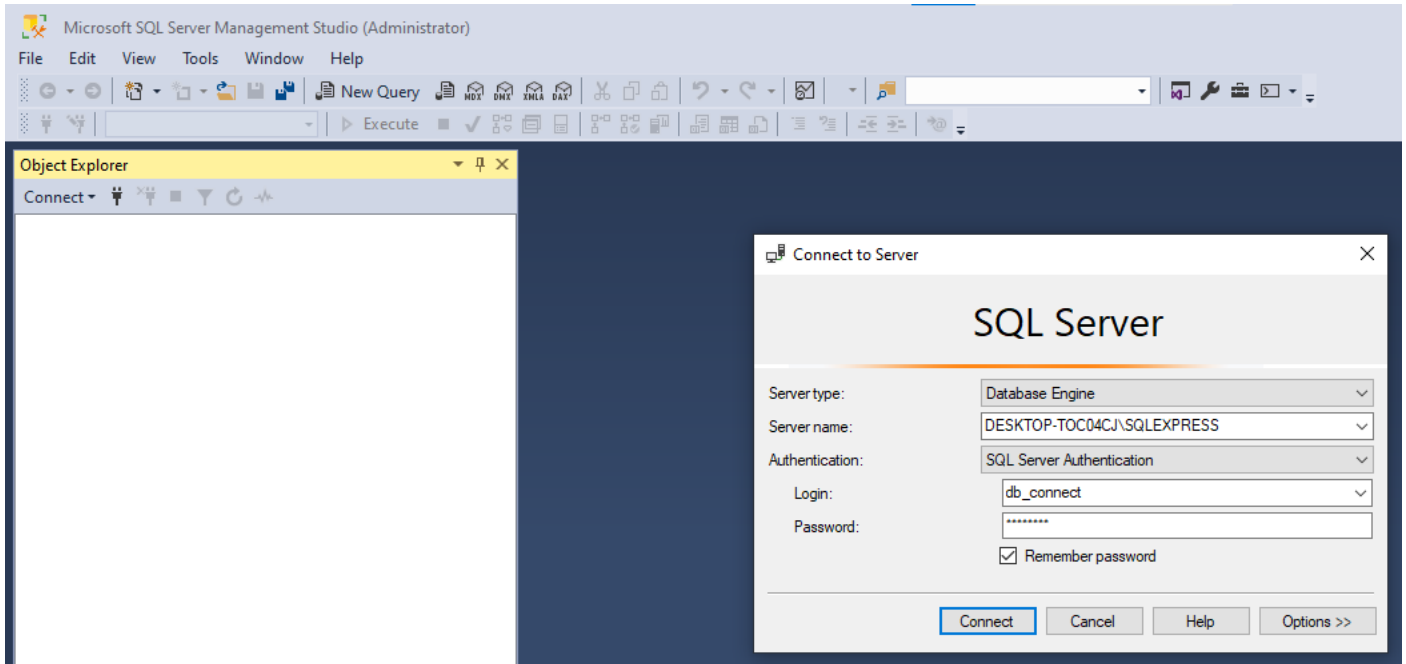

Instalación Pentaho Community Edition

Se presiona ok, y se procede a probar ingresar con la cuenta, cambiando el tipo de autenticación:

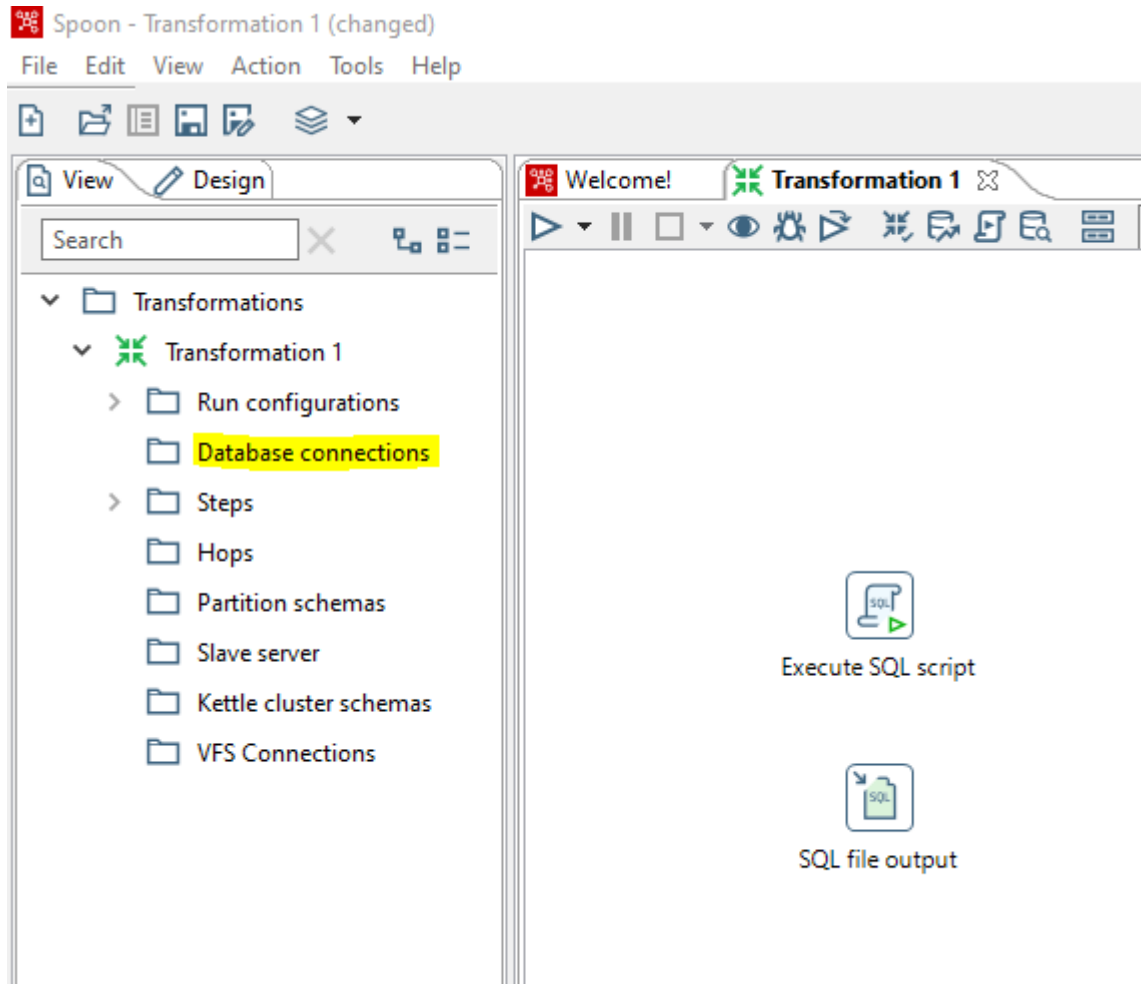

Instalación Pentaho Community Edition

Instalación Pentaho Community Edition

Creación de conexión a la Base de datos desde el Spoon.

Para crear la conexión en Spoon, presionar clic derecho en Database Connections, seleccionado New

Instalación Pentaho Community Edition

Utilizando el driver MS SQL Server (Native), completar los campos de:

- Connection name: un nombre para la conexión
- Hostname: nombre de la máquina o utilizar localhost
- Database Name: utilizar el nombre de la bases de datos deseada
- Instance Name: nombre de la instancia, por defecto en SQL Express es SQLEXPRESS
- Username: utilizar sa
- Password: utilizar las credenciales de sa.
